DETAILED ACTION

1. This Action is in response to applicant's amendment filed on January 31, 2007. Claims 1-20 are still pending in the present application.

Allowable Subject Matter

2. Claims 1-20 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Consider claim 1, the best prior art found during the examination of the present application, Lupien (U. S. Pat. No. 6,006,091) fails to disclose determining by the network whether new bit map related information is required for completing the setup procedures by the terminal. Lupien discloses sending a compatibility update request and receiving a capability update response (see fig. 1 steps 17-18, and col. 7 lines 12-50). Lupien discloses performing the setup procedures at the terminal using instructions contained in a command/information signal (col. 5 lines 45-col. 6 line 11). Lupien discloses completing the setup procedures by the terminal using further instructions contained in the command/information signal sent by the network (col. 7 lines 11-50). However, Lupien fails to disclose performing the setup procedures using instructions contained in a command/information signal while waiting for the new bit map related information from the network for completing said procedures. Lupien fails to disclose completing the setup procedures by the terminal using further instructions contained in the command/information signal sent by the network wherein said instructions are configured by the network based on a new bit map signal generated by the network.

Thandu (US Pat. 6,597,921 B2) fails to disclose determining by the network whether new bit map related information is required for completing the setup procedures by the terminal; performing the setup procedures using instructions contained in a command/information signal while waiting for the new bit map related information from the network for completing said procedures; and completing the setup procedures by the terminal using further instructions contained in the command/information signal sent by the network wherein said instructions are configured by the network based on a new bit map signal generated by the network, and no suggestion or motivation of the terminal fault corrections as claimed in the present application is provided by Thandu, therefore, this limitation, in conjunction with the other limitations recited in claim 18 is novel and unobvious in view of Lupien and further in view of Thandu, and prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
